

# Waterloop

# **Evaporator with built-in compressor**

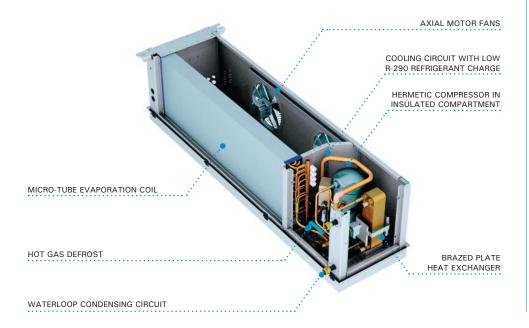

- **Solution** Compact unit condensed by water.
- **Minimal R-290 refrigerant charge.**
- Easy and safe installation with connection to the condensation water circuit.

Waterloop evaporator units with compressor are compact units for installation inside small cold rooms, designed with natural refrigerant R-290 and waterloop condensed.

### **Features**

- 230V 50Hz or 400V 3N 50Hz power supply. Available in 60 Hz. Others voltages by request.
- R-290 refrigerant charge low than 0.25 kg.
- Bodywork in aluminium sheet and structure in galvanised steel lacquered in polyester paint.
- ▶ Alternative hermetic or scroll compressor integrated in thermally insulated compartment, with crankcase heater.
- Refrigeration circuit in annealed copper tube, with high pressure switch, filter drier and load valve.
- Evaporation coil in copper pipes and aluminium fins, thermostatic expansion valve and hot gas defrost.
- Axial motor fans.
- ► Stainless steel brazed plates heat exchanger.
- ► Threaded hydraulic connections.
- Control panel in white lacquered sheet metal cabinet, with MCB protection and multifunction electronic control (optional).

#### Installatio

Installation of a closed loop water evaporator unit with an air cooler and general electrical panel:

# Compact R-290 system

The waterloop evaporator units are hermetically sealed compact systems with a minimum charge of R-290, exempt from the application EN 378.

They have a minimum R-290 refrigerant charge lower than the practical limit of the refrigerated volume.

# Electrical board (optional)

Electrical power and control board for outside installation.

- MCB protection of compressor and manoeuvre.
- Electronic control with temperature control and recording of maximum and minimum temperatures.
- Jet Cool function.
- Energy saving function.
- Optional air condenser management with water loop temperature control and frost protection.

# 230V 50Hz / 400V 3N 50Hz | Positive temperature | Hermetic compressor - Scroll compressor | R-290

Refrigerant	Compressor	Serie / Modelo	Compressor		Cooling capacity / cold room volume (W) (1)		Input power	Max.	Evap.	Condenser	Condenser	Hydraulic	Refrigerant charge	Weight	Dry-cooler model (4)

# **Options**

- ► Electrical board for one unit.
- ▶ Electrical board for two units in the same cold room.
- ▶ Water solenoid valve for multi-equipment waterloop installation.

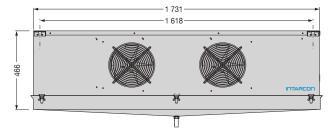

# **Dimensions**

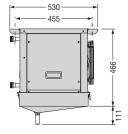

# 1 series

# 2 series

Dimensions in mm.

- <sup>(1)</sup>Nominal performances refer to operation with cold room temperatures of 0 °C (PT) and -20 °C (NT) and water inlet condensation temperature of 40 °C. Estimated cold room volume according to conditions of the calculation bases (page 12).
- $\ensuremath{^{(2)}}$  Condenser pressure drop in the water circuit.
- $^{\mbox{\tiny (3)}}$  A3 refrigerant charge less than 0.5 kg, units exempt from, Regulation (EU) No 517/2014.
- <sup>(4)</sup> Recommended air cooler model to combine with the evaporator unit.

# Electrical interconnections

For the electrical interconnection from the electrical panel to the unit and to the air condenser (optional), the following interconnection cables must be provided:

Cabinet - Evaporator	Connection				
Compressor for single-phase units (except MCC-ND-1 034)*	3 x 1.5 mm <sup>2</sup> + T				
Compressor for three-phase units and MCC-ND-1 034	3 x 2.5 mm <sup>2</sup> + T				
Manoeuvre	7 x 1 mm <sup>2</sup>				
Probes	5 x 1 mm <sup>2</sup>				
Cabinet - Dry-cooler	Connection				
Pump (1 + 1 system)	2 x 1.5 mm <sup>2</sup> + T				
Fan (1 + 1 system)	3 x 1 mm <sup>2</sup>				
Probes (1 + 1 system)	3 x 1 mm <sup>2</sup>				
Pumping permit (multi system)	2 x 1 mm <sup>2</sup>
